

COMUNE di ROCCASTRADA
(Provincia di Grosseto)

PIANO STRUTTURALE

STUDIO GEOLOGICO
(Ai sensi della L.R. 5/95, Del.C.R. 94/85 e Del. C.R. 230/94)

Carta delle risorse idriche e della vulnerabilit  dei suoli

Scala 1:25.000

LEGENDA

ZONA 1
Bassa vulnerabilit 

ZONA 2
Media vulnerabilit 

ZONA 3
Alta vulnerabilit 

Siti potenziali per la realizzazione di bacini collinari
(per i numeri vedere la relazione)

Aree sottoposte a variante urbanistica di adeguamento al P.R.A.E.

Sorgente

Gruppo di progettazione:

dott. arch. Carlo Nepi (Progettista incaricato)
dott. arch. Claudio Mancianti
dott. arch. Massimo Marini

dott. Giuseppe Monaci (Agronomo)
dott. Franco Pioli (Geologo)
Avv. Umberto Gulina (Giurista)

This figure is a detailed topographic map of the Roccastrada area, overlaid with a grid. The map illustrates the geographical distribution of water resources and soil vulnerability. Key features include:

- Vulnerability Zones:** The map is divided into three main zones: ZONA 1 (Bassa vulnerabilit ) shown in light green, ZONA 2 (Media vulnerabilit ) shown in light blue, and ZONA 3 (Alta vulnerabilit ) shown in pink. ZONA 3 covers a large area in the bottom-left corner.
- Urban and Infrastructure Areas:** A large area in the bottom-left is shaded with diagonal lines, indicating areas subject to urban planning variations (P.R.A.E.).
- Water Resources:** Several small, irregularly shaped areas are highlighted in cyan and numbered 1 through 6, representing potential sites for hillside basins. These are located in the upper-left, central, and lower-right portions of the map.
- Topography:** The map features numerous contour lines indicating elevation, as well as labels for various towns and geographical features.
